# Project Introduction

## Project Purpose

To increase efficiency, optimize the workforce and provide improvements in the production process by monitoring production processes.

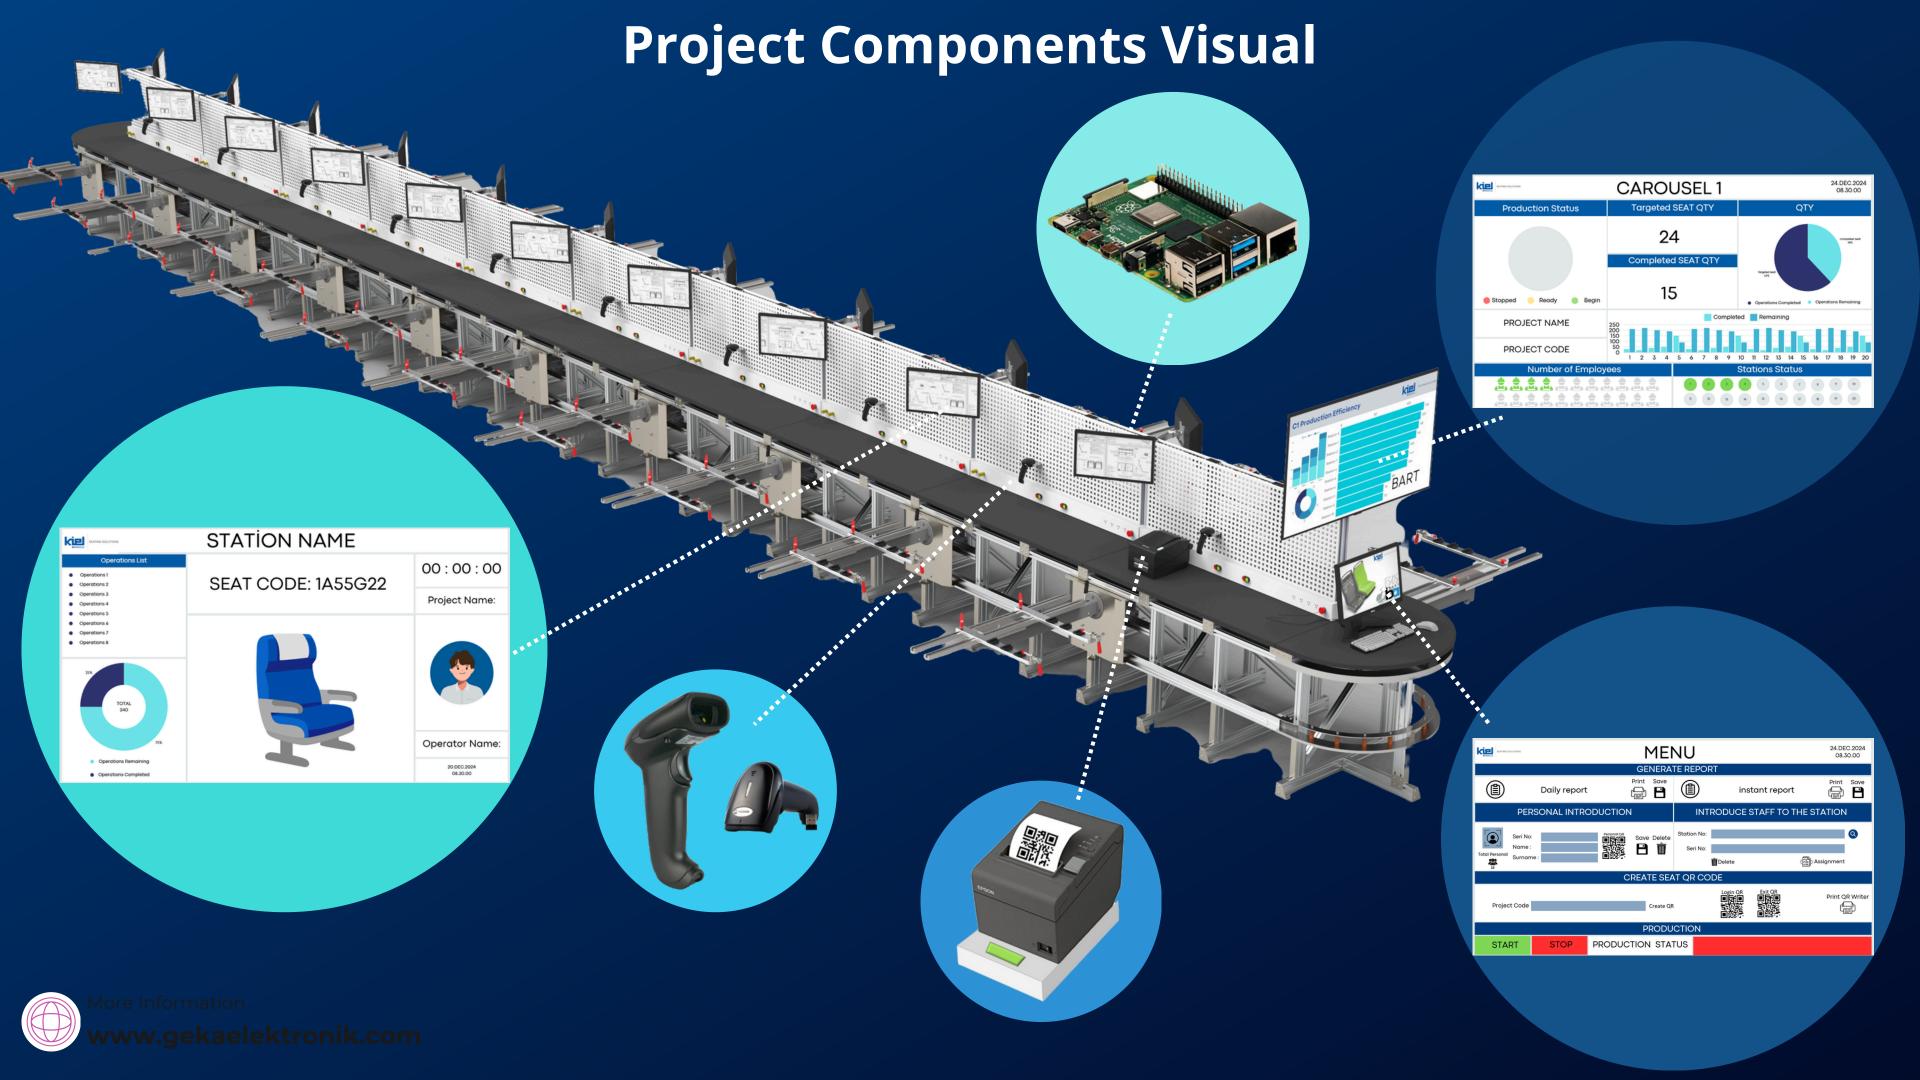

## Project Scope

By communicating with production stations via the main computer, personnel introduction, work order assignment, tracking of task durations, product tracking with QR code and productivity analysis will be performed.

# Project Components

#### **PROJECT FLOW CHART**

- 2. Entering work orders
- 3. Personnel assignment to stations
- 4. Starting, holding and stopping production
- 5. Receiving daily and instant reports
- 6. Productivity Analysis
- 7. Creating Entry and Exit QR

1. Printing entry and exit QRs

#### **Raspberry Pi**

- 1. Communication with the server
- 2. Sharing production data with the server
- 3. Managing the production tracking screen
- 4. Obtaining information from the QR reader

Work Order and Production Tracking Screen

- 1. Station work order tracking
- 2. Operation numbers
- 3. Project name tracking
- 4. Operator name
- 5. Task counter
- 6. Date and Time

1. Reading Entry and Exit QRs

2. Staff QR reading
